

PROJECT DETAILS

Boulderscape Finish
Solana Beach Blend

Color Scheme
Light Earth Blend

Shotcrete Thickness
11 inches

Average Relief
3 inches

Retaining Wall System
Soil Nail Walls

Shotcrete Mix
4000 PSI

PROJECT OVERVIEW This segment of worn sandstone comprises a small section within a large stretch of geological facing that together totals over 64,000 square feet. In addition to being applied alongside the tracks and train station, the facing was also applied as a treatment below several bridges.

FEATURES AND BENEFITS:

30 - 40% cheaper than form-liner finishes

50% faster to install than form-liner finishes

No Repetition. Each finish is site-specific and highly customized

Waste Elimination. BSI Finishes do not require any type of form-liner fitting
